NOTHING COIN

WHITEPAPER

INTRODUCTION

NOTHING COIN: THE WORLD'S FIRST COIN WITH (ALMOST) NO PURPOSE

In a world where thousands of tokens are published on PumpFun every day, where presidents pull a rugpull on millions of people and new investors don't know which cryptocurrency to invest in, there is now a light at the end of the tunnel. A light with no... technical purpose.

May we introduce?
The **NOTHING COIN**!

FUNCTION AND PURPOSE

Our coin has no use from a technical point of view. However, its entire utility depends on all other aspects. It should serve as a symbol. A sign against all the giants in the crypto world. Against all those who rip off other people every day. Against all those who think they can achieve something big with simple PumpFun tokens.

The Nothing Coin should prove to everyone that with the power of a strong community, loud voices and a lot of motivation, you can achieve something big! We are proving to the world that we are not dependent on the big players!

Despite the fact that our coin has no technical function for the first time, we are planning big things for the future! Some of our goals are also to be listed on the major exchanges to overwhelm everyone else!

Join us and become part of an unforgettable adventure!

TOKENOMICS

Here we show you what the entire amount of Nothing coins is used for:

- ***30% PRESALE***

A large proportion of the tokens will be used for our pre-sale. In this way, we want to ensure a fair start and give everyone the opportunity to get a piece of the pie.

- ***30% MARKETING***

Another big part is marketing. It is absolutely important for us to reach as many people as possible. We want to use all possible social media channels for this. Maybe you'll see us in Time Square soon?

- ***40% NOTHING***

Yes, you read that correctly. Nothing. A large proportion is used for nothing. Well, that's only half the truth. Of course we will do several useful things (like burning tokens in the near future). We have a lot of stuff planned, but we don't want a PDF as long as the Bible.

ROADMAP

1.   *PRESALE PHASE*

We want to give everyone who is interested the opportunity to buy tokens before our token is available for normal trading. The available number of tokens can then be purchased by you during this phase.

2.   *TOKEN LAUNCH*

As soon as the presale is over, our token will be made available for normal trading. From this point on, we will gradually list our token on the usual exchanges.

3.   *NOTHING*

Lying again. Sorry. The third step is not that we do nothing. On the contrary, this step is the most important of all. From here on, we will do everything we can to make the Nothing Coin bigger and better. We will also work on future applications so that "nothing" can also become something big.

JOIN THE REVOLUTION

Nothing Coin is the first and only token with a profound meaning. A movement that has never existed in this form (on the Solana blockchain) before. Be part of it and don't miss out on this adventure that will never end.
